

Broadband

We understand that in an internet driven world broadband is one of the most fundamental parts of your business.

Our products offer unlimited usage, low contention, QoS and static IP addresses as standard, this coupled with our skilled engineering team mean you are never left lagging behind and you always have the best possible connection into your business.

Our reach covers 3 different carriers and 100% of UK exchanges meaning we can tailor a tariff and offering specific to any location making sure we deliver you the best connection possible.

Broadband:

Multiple broadband products from a range of suppliers available from affordable home worker broadband up to dedicated 1:1 circuits used for VoIP or hosted solutions.

Bonded broadband:

2-4 broadband circuits are bonded together which generates up to four times the speed of conventional broadband.

FTTC:

Fibre To The Cabinet broadband is a new data product available at approximately 1600 exchanges. Fibre is delivered to the local street cabinet, which results in download speeds of up to 80MB and upload speeds of up to 20MB.

EFM:

Ethernet in the First Mile involves fusing together copper wires to offer a replacement to the traditional leased line solution. The product offers a low cost solution and achieves both upload and download speeds of up to 20MB.

Fibre/Direct Internet Access:

NSN's Dedicated Internet Access circuits range from 1Mb/s to 1Gb/s. We provision circuits from all the major UK carriers at the most competitive pricing in the channel. All services come with a managed router and are proactively monitored 24/7.
