

Dedicated Internet Access (DIA)

(Data)

NSN's Dedicated Internet Access circuits range from 1Mb/s to 1Gb/s. We provision circuits from all the major UK carriers at the most competitive pricing in the channel. Services are available on both managed and unmanaged options. All managed services come with a managed router and are proactively monitored 24/7.

Fibre Ethernet:

Fibre Ethernet is the most scalable and reliable site connectivity type offering the highest bandwidths available – up to 1Gbps. Fibre provisioning from Ethernet Nodes to Customer Premises removes the degradation in performance experienced with copper tails. Fibre Ethernet circuits are high speed, uncontended, full duplex symmetrical connections that deliver guaranteed throughput.

FTTC Ethernet:

FTTC Ethernet is a range of new lower cost Ethernet access solutions that use Fibre-To-The-Cabinet tail technology offering significantly reduced lead time and lower rental costs compared to traditional optical Ethernet circuits and EFM. Bandwidth supplied is symmetrical and uncontended up to 20Mb/s depending on the capabilities of the copper line. For the BTW FTTC Ethernet service a dedicated PSTN line is required.

Benefits summary:

- Largest range at best pricing
- Every price in minutes
- Excellent pre-sales support
- Dedicated account management
- Experienced project delivery
- Faster fault diagnostics and resolutions

Features summary:

- Up to 1Gb/s circuits
- Wires only and fully managed options
- Extensive UK coverage
- Back up options
- Monitoring services

* Only available on BT EFM.

Ethernet in the First Mile (EFM):

EFM is an innovative access technology delivered over multiple copper pairs providing uncontended symmetric circuits with guaranteed bandwidth. We offer speeds from 1Mb/s to 35Mb/s* over multiple copper pairs. With dedicated bandwidth this service is suitable for real time applications such as VoIP.

Backup Options:

We offer three back up options, ADSL, FTTC/FTTP and Ethernet back up. Customers with business critical services are advised to take these options. If a more complex back-up solution is required please speak to our pre-sales team.
